Skills

Languages: JavaScript, TypeScript, Python

Technologies & Frameworks: React Native, ReactJS, NextJS

Basic Knowledge: Flutter, SwiftUI

About Me

A React Native & React.js developer with 5+ years of experience, specializing in scalable mobile applications across e-commerce, fintech, and on-demand services. As a Team Lead, I have mentored developers, designed scalable solutions, and implemented complex features, including real-time tracking, maps, and payment gateways

I bring international work experience, having successfully delivered projects in Oman and the UAE, showcasing my ability to manage and execute critical milestones under diverse business environments. I am passionate about open-source contributions, automation, and performance optimization, consistently striving to create impactful solutions.

Work Experience

Code Brew Labs, Chandigarh

May 2022 - Present

Team Lead

- Developed an e-commerce clothing app supporting English & Arabic, optimized for performance, serving millions of users with a 99.9% crash-free rate.
- Integrated Taxi, Food, On-Demand, E-Commerce, Cab Booking, and Pickup & Delivery solutions into the company's core product.
- Built fintech web & mobile applications using ReactJS, React Native, and Next.js.
- Contributed to Flutter projects, designing screens and implementing API integrations.
- Optimized CI/CD pipeline, integrating CodePush for faster build sharing.
- Developed a React Native boilerplate for developers to clone and start new projects.
- Automated Android APK generation & S3 uploads with a Node.js script.

Tech Stack: React Native, ReactJS, NextJS, Flutter, CI/CD, Node.js.

Code Brew Labs, Chandigarh

Aug 2020 - May 2022

React Native

- Worked on various custom projects, including e-commerce, freelancer platforms, fitness, and meditation apps.

Tech Stack: React Native, JavaScript, Firebase, Push Notifications, Redux, Rest API.

Code Brew Labs, Chandigarh

Jan 2020 - Aug 2020

React Native Intern

- Completed internship with successful outcomes and transitioned into an enrolled position.

Tech Stack: HTML, CSS, JavaScript, React Native Expo, React Native CLI, XCode, AndroidStudio.

Project Work

- **RedTag:** An e-commerce platform where users can buy clothing, shoes and homeware products. The app actively serves customers across Gulf countries and has millions of users.

Role: Solo Developer : Built the customer apps in React Native and successfully delivered the project onsite in the UAE.

Key Stats:

- **31K Daily Active Users (DAUs)**
- **20.5% Day 1 Retention Rate**
- **SAR 1.63M revenue generated in a week (3.5% increase)**

Android link: https://play.google.com/store/apps/details?id=com.bma.redtag&hl=en_IN

- **du Pay:** du Pay is a secure and user-friendly mobile payment service, regulated by the Central Bank of the UAE, enabling seamless digital transactions, instant money transfers, and hassle-free bill payments

Role: 2-person team : Implement new UI/UX designs and integrate APIs.

Key Stats:

- **1L+ Download**

iOS link: <https://apps.apple.com/ae/app/du-pay/id6479500146>

Android link: https://play.google.com/store/apps/details?id=com.eitcfs.dupay&hl=en_IN%22

- **Royo 2.0:** Developed the Royo 2.0 product, the core product of the company, enabling multi-business solutions from a single codebase. Integrated features such as e-commerce, on-demand services, P2P, grocery, rentals, and cab booking.

Role: Led a team of six React Native developers, assigning tasks based on expertise. Designed the app architecture, integrated the taxi module, implemented the add-to-cart feature, optimized the code for performance, integrated maps, and developed real-time driver tracking functionality.

- **Khedmah:** A food delivery platform serving customers in Oman. The app includes separate applications for customers, drivers, and vendors, ensuring a seamless order and delivery experience.

Role: Solo Developer : Built the customer, driver, and vendor apps in React Native. Traveled to Oman to deliver the first phase milestone of the app.

- **AAB World:** It is an ecommerce platform where users can buy cameras and their accessories.

iOS link: <https://apps.apple.com/in/app/aab-world/id1103244042>

Android link: <https://play.google.com/store/apps/details?id=com.aabworld&hl=en&gl=US>

Role: Solo Developer : Built the customer apps in React Native.

- **SABROSÓN:** It is a Mexican food delivery app with over 10K+ downloads. I built two apps, one for customers and another for drivers.

Role: Solo Developer : Built the customer, driver, and vendor apps in React Native.

iOS: <https://apps.apple.com/us/app/sabros%C3%B3n-app/id1635962198>

Android : <https://play.google.com/store/apps/details?id=com.sabroson.orders&hl=en&gl=US&pli=1>

Open Source Project Creator and Contributor

- **react-native-maps-here:** Enhanced the library by contributing a Routing Feature for iOS, integrating HERE Maps SDK into React Native.

Link: <https://github.com/ajakka/react-native-maps-here/tree/feature-routing>

- **ScreenShield:** Bridged a native iOS SDK to React Native to prevent screen recording when no suitable npm packages were available.

Link: <https://github.com/JayantBadlani/ScreenShield>

- **react-native-bg-location:** Developed an npm package for fetching the user's latitude and longitude in both foreground and background modes

Link: <https://github.com/gulsher7/react-native-bg-location>

- **RNBrewKit:** Developed a React Native boilerplate with essential configurations for projects, including libraries, navigation, state management, and styling setup.

Education

ICFAI University, Himachal

B.Tech. in Computer Science and Engineering

Aug 2016 - Jun 2020

CGPA:7.8/10

Awards and Certificates

- Meta iOS Developer Professional on Coursera : 2024
- Excellence Award by Code Brew Labs 2022
- Best Performer Award by Code brew Labs 2021
